

Paediatric Hospital Reporting V12.5 data form

Admission date
Hospital no
Name
DOB **Age** **Sex** M F
Province
District
Village
Vaccinations Fully immunised for age Partially immunised for age Unvaccinated
Referred in Yes No **Referred from**
Outcome Survived to hospital discharge Died Transferred out Absconded
Date of discharge/transfer/death
Readmission Yes No
Anaemia Yes No
SpO₂ %
In hospital complications
 Hospital Acquired Infection
 Intravenous complications
Complications other
HIV Negative Positive Not tested

Nutritional state **Wt** **kg** Weight for age greater than -2 standard deviations (good weight) Weight for age between -2 and -3 standard deviations (underweight) Weight for age less than -3 standard deviations (severely underweight)
Mid Upper Arm Circumference mm

Respiratory
 Pneumonia - severe Bronchiolitis Croup Asthma Acute otitis media Respiratory other
 Pneumonia - non severe Whooping cough Bronchiectasis Chronic serous otitis media
 COVID-19 acute respiratory infection

Gastrointestinal
 Acute watery diarrhoea Dysentery Malnutrition - Marasmus / kwashiorkor Iron deficiency Beri beri
 Persistent diarrhoea Cholera Bottle fed Typhoid Hepatitis
 Vitamin A deficiency Pigbel Gastrointestinal Other

Acute rash and fever
 Severe sepsis / shock (including bacteraemia) Rubella Rickettsia Dengue fever Dengue Haemorrhagic fever
 Measles Chickenpox Melioid Dengue shock syndrome Rheumatic fever
 COVID-19-fever

Skin, bone and joint infection
 Cellulitis (skin sepsis) Septic arthritis (joint infection)
 Osteomyelitis (bone infection) Pyomyositis /fasciitis (muscle infection or abscess)

Malaria Uncomplicated malaria Malaria with seizures
 Malaria - severe / complicated (severe anaemia, acute renal failure, pulmonary oedema) Cerebral malaria

Chronic Neurological
 Cerebral palsy
 Epilepsy
 Hydrocephalus
 Developmental delay
 Subacute Sclerosing Panencephalitis (SSPE)
Acute Neurology / Meningitis
 Meningitis - Haemophilus influenzae Japanese encephalitis
 Meningitis - Streptococcus pneumoniae Encephalitis-other
 Meningitis - Neisseria meningitidis Febrile convulsions
 Cryptococcal meningitis Acute flaccid paralysis
 Meningitis - no cause identified Neurological Other

Tuberculosis
 Pulmonary TB Bone and joint TB (including Potts disease of the spine) TB pericardial effusion
 TB meningitis / CNS TB Abdominal TB Disseminated TB (including miliary TB)
 Lymph node TB Miliary TB Proven Multi-drug resistant TB (MDRTB)

Emergency / Surgical Appendicitis Poisoning Tetanus
 Bowel obstruction Snakebite Surgical Other
Trauma / Injury Burns Trauma
 Drowning Other
Heart disease
 Heart disease - congenital
 Heart disease - rheumatic
 Heart disease other

Cancer Wilms Tumour Leukaemia Lymphoma Retinoblastoma CNS tumour Neuroblastoma Cancer Other

Renal Urinary tract infection Glomerulonephritis Renal Other Thalassaemia Haematology Other Type 1 Diabetes
 Nephrotic syndrome Renal tubular acidosis Sickle-cell anaemia Thyroid disease

HIV HIV exposed Yes No Chronic lung disease Yes No Prophylactic cotrimoxazole Yes No
Patient on ART Yes No Persistent diarrhoea Yes No Pneumocystis pneumonia Yes No
 Development delayed Yes No

Child protection Physical abuse Sexual abuse Neglect **Adopted** Yes No
